Karla Dana was a 29 year old scholar and explorer from Mexico. She began her career at NASA Ames Research Center in Silicon Valley before turning her attention to cultural preservation in her early 20s.

In June 2024 she began graduate studies in Archeology at the University of the Highlands and Islands. Her first excavation was unearthing Iron Age Viking artefacts on Orkney.

She was a member of the Explorers Club and it was as part of a six person crew on an attempt to sail from the Faroes to Norway in a replica Viking vessel that she lost her life when the boat capsized in rough seas.
